Please note: numbers in recent days may rise, reflecting diagnostic and reporting turnaround time. All detail within this report is the latest data available prior to publishing (26/05/2021).

Week-to-week comparisons are based on the data available at the time each snapshot was published.

On the 18th May there was a change to case reporting in England. The introduction of a new system disrupted the removal of cases where a positive rapid lateral flow test was followed by all negative polymerase chain reaction (PCR) tests taken within 3 days. This resulted in the removal of 22 cases for Central Bedfordshire.
